

YOUR PARTNER FOR INDUSTRY  
SOLUTIONS AND BUSINESS SOFTWARE

## WE FOCUS – YOU PROFIT

*“Those who target their resources benefit from impact and efficiency. This is precisely the focus of IKOffice: individual solutions that are exactly tailored to your operations and your field of business.”*

**Ingo Kuhlmann**

Director, IKOffice GmbH

IKOffice GmbH is a software development company. For 15 years we have been developing and implementing business applications and industry solutions that are both highly flexible and customizable. When designing our software there is one thing we bear in mind above all others – how your business operates. Our solutions rationalize administration, promote organization, accelerate processes and optimize production. Increasing efficiency, improving quality and reducing cost for your business are all part of our job. To achieve this, we take a critical look at the specific features of your sector and the challenges you face in day-to-day business.

A targeted focus means more effective pooling of resources. That's why we have concentrated on the backbone of the German economy: small and medium-sized businesses. And we know full well that SMEs are highly cost sensitive! There's no place for never-ending projects and consultancy agreements here. Our licensing, support and maintenance model is designed entirely with SMEs in mind and will quickly prove its worth.

You'll benefit from the many years of expertise brought by our well-established team of IT specialists, engineers, production planners, sales staff and technicians. Together they will design and develop business software that is individual to you, based on IKOffice's proven solutions. The team is on hand to support and advise you during rollout, in everyday operations and when you need to make future updates.

## INDUSTRY SOLUTIONS

Only you know the ins and outs of your company's operations and procedures. At IKOffice we take account of the specifics of your sector and your company's unique features and factor these into our powerful IKOffice software modules. This enables us to create a solution that fits your organization like a glove. The result is an unbeatable individual solution that has all the robustness of a tried-and-tested standard application. This software helps support your business and provides a solid basis for:

- optimized resource and capacity planning
- production planning and control
- project planning and control
- rationalized administrative procedures
- customer relationship and document management
- quality assurance and quality improvements

All modules are clear and simple to use. By incorporating the latest usability techniques and creating intuitive interfaces, we have been able to curtail the amount of training required and speed up rollout. Not only that, the software developed by IKOffice makes your company smarter and more flexible while increasing its efficiency and effectiveness.

## BUSINESS APPLICATIONS

We analyze business processes before carefully mapping and optimizing them in a unique system. Thanks to this, you get a clear and structured view of your order situation and capacities as well as access to information on enquiries, prospects, customers and suppliers, right through to orders and processing. In short: IKOffice shores up your day-to-day operations. Our expertise lies in:

- Enterprise Resource Planning (ERP)
- Production Planning and Control Systems (PPC)
- Human Resources Management (HRM)
- Supply Chain Management (SCM)
- Workflow Management Systems (WfM)
- Customer Relationship Management (CRM)
- Document Management Systems (DMS)

IKOffice's sales models put the customer first. In addition to fixed-cost products and services, you'll benefit from reasonably priced corporate licenses that will allow your business to grow without constraint.
