### YOUR INDUSTRY ERP FOR PLASTIC, STAMPED AND FORMED PARTS

IKOffice LivingERP is a comprehensive ERP solution with an industry focus. The powerful system knows exactly the requirements of the industry and is aware of the complicated interaction between tool and mold making and article production. With IKOffice MoldManager, IKOffice LivingERP creates a seamless link between article-based and project-based manufacturing and closes the process chain from the article idea to series production.

Your company is an "organism" that is constantly exposed to changes in its environment and has to deliver maximum performance at all times. This task can only be accomplished if the organs of this organism do not perform their respective tasks in isolation, but in interaction. If influences change, rules, ways and means that have been tried and tested for years must also be adapted or changed. In a company, this task has to be performed by an extensive and powerful information processing system. This should be changeable, fast and efficient in the long term. Its connections have to supply the departments clearly, understandably and sufficiently. The rules and regulations need to be transparent and simple. This idea is the focus of the system we have developed for this task and that is why we call it IKOffice LivingERP.

#### INTEGRATION THROUGH OWN WORKFLOW

IKOffice LivingERP supports the transfer of information, task and deadline monitoring, as well as the assignment of activities to the appropriate clerk through the integrated workflow management. You have the possibility to design your processes without any restrictions with IKOffice Living ERP. In defined steps, you process inquiries systematically and in a controlled manner, create quotations, confirm orders, control stocks, manage and evaluate warehouses and invoice down payments, partial and total invoices. In doing so, you use modern B2B technologies such as EDI or FeRD.

"If you deploy your resources with pinpoint accuracy, you gain in clout and profitability. This is precisely the focus of IKOffice: individual solutions that are precisely tailored to your operating processes and your business field."

*Ingo Kuhlmann* Managing Director, IKOffice GmbH

#### INTUITIVE OPERATION, ADVICE AND NAVIGATION

Event-driven tasks and messages inform you about ToDo's and lead the relevant users directly to the places in the system where tasks and decisions are waiting. Design the menus in the order that makes sense for you and save their filters and sorting. The report builder allows you to design your documents. In addition, the export and import in all common Microsoft Office products, facilitates the daily work and saves annoying double entries. A role-based rights system enables the assignment of access rights at control element level.

#### CONTROL AND INFORMATION

Has the request been processed yet? Is the offer already out? Were we too expensive last time? What's our order backlog? Has the invoice arrived yet? Our IKOffice LivingERP answers these and many other questions simply and clearly. Since it is directly adapted to your requirements, training efforts remain low. You will find your way around immediately. The integrated document management makes it easy for you to assign all information to business transactions. IKOffice LivingERP makes it available to you clearly, quickly and concisely.
